

Ravi Dahiya

SOC Analyst | Cybersecurity Analyst

| [Sonipat, Haryana, India](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Email](#) | [TryHackme](#) |

MCA graduate seeking an entry-level SOC Analyst role, with hands-on project experience in network traffic analysis, threat intelligence, vulnerability assessment, malware analysis, and security monitoring. Experienced in developing Python-based security tools and investigating network traffic, Windows event logs, phishing emails, and SIEM alerts. Proficient in Python, Nmap, Wireshark, and Linux. Ranked in the Top 1% on TryHackMe, with 134+ completed labs and 13 badges.

Experience

Cybersecurity Intern

Unified Mentor Pvt. Ltd., Gurugram

(Dec 2025 – Jun 2026)

- Performed network scanning and vulnerability assessment using Nmap.
- Conducted packet analysis using Wireshark to identify suspicious network activity.
- Developed Python-based cybersecurity tools for security monitoring, network analysis, and threat detection.
- Worked extensively in Linux environments for security testing.
- Collaborated with the cybersecurity team on practical security projects.

Projects

1. Smart Honeypot System for Analyzing Zero-Day Attacks

Technologies: Python, Django, Django Channels, WebSockets, Redis, SQLite

[\(View Project\)](#)

- Built a Python-based honeypot to simulate SSH, FTP, HTTP, Telnet and SMB services in a controlled environment.
- Developed a Django dashboard to monitor attack activity, visualize attack timelines and display protocol distributions.
- Implemented threat scoring, IP reputation lookups and attack-pattern analysis.
- Added attack data export in CSV, JSON and PDF formats.

2. Microsoft Defender + Wazuh SIEM Investigation

Technologies: Wazuh, Microsoft Defender, Windows

[\(View Project\)](#)

- Configured a security-monitoring lab using Wazuh and Microsoft Defender.
- Investigated alerts generated during controlled EICAR test-file detection.
- Analysed Windows security events and correlated endpoint logs with SIEM alerts.
- Documented detection evidence and verified quarantine or remediation status.

3. Phishing Email & Business Email Compromise (BEC) Analysis

Technologies: Email Header Analysis, SPF, DKIM, DMARC, SHA-256

[\(View Project\)](#)

- Analysed a simulated vendor-payment email for phishing and BEC indicators.
- Investigated sender details, Reply-To mismatches and email authentication results.
- Used SHA-256 hashing to document file integrity where applicable.
- Prepared an incident-analysis report documenting findings and investigation results.

4. PDF Malware Analysis Toolkit

Technologies: Python, PDFiD, pdf-parser.py, YARA, SQLite

[\(View Project\)](#)

- Developed a Python-based toolkit to inspect PDF files for suspicious structures and objects.
- Analysed PDF metadata, JavaScript indicators and embedded objects using PDF analysis utilities.

- Extracted indicators of compromise (IOCs) and documented analysis findings.
- Generated risk summaries to support repeatable malware-analysis workflows.

Skills

Tools: Nmap, Wireshark, Burp Suite, Metasploit

Networking: TCP/IP, DNS, HTTP, OSI Model

Programming: Python, Bash

Operating Systems: Kali Linux, Ubuntu, Windows

Certifications

- Junior Cybersecurity Analyst – Cisco Networking Academy
- Ethical Hacker – Cisco Networking Academy
- Cyber Threat Management – Cisco Networking Academy
- Endpoint Security – Cisco Networking Academy
- Cybersecurity Job Simulation – Forage

Education

Masters of Computer Applications (MCA), DCRUST University

H.I.M. College Sonipat | Aug 2024 – Aug 2026

- 7.51 CGPA

B.Sc. Computer Science, MDU University

C.R.A. College Sonipat | Aug 2021 – Aug 2024

ACHIEVEMENTS

- Ranked in the **Top 1% on TryHackMe** with **134+ completed labs and 13 badges**.
- Successfully completed a **6-month Cybersecurity Internship** and received a **Letter of Recommendation**.
- Developed multiple Python-based cybersecurity tools for malware analysis, threat detection, and system monitoring.
