

Ravi Dahiya

[Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Email](#) | [TryHackme](#) |

Cybersecurity enthusiast with hands-on experience in network security, vulnerability assessment, malware analysis, threat detection, and Python-based security tool development. Proficient in Kali Linux, Python, Nmap, Wireshark, and Burp Suite. Seeking an entry-level SOC Analyst or Cyber Security Analyst role.

Experience

Cybersecurity Intern

Unified Mentor Pvt. Ltd., Gurugram

(Dec 2025 – Jun 2026)

- Performed network scanning and vulnerability assessment using Nmap.
- Conducted packet analysis using Wireshark to identify suspicious network activity.
- Developed Python-based cybersecurity tools for security monitoring, network analysis, and threat detection.
- Worked extensively in Linux environments for security testing.
- Collaborated with the cybersecurity team on practical security projects.

Projects

Smart Honeypot System for Analyzing Zero-Day Attacks

[GitHub](#)

Tech Stack: Python, Django, Django Channels, WebSockets, Redis, SQLite, HTML, CSS, JavaScript

- Developed a smart honeypot system simulating SSH, FTP, HTTP, Telnet and SMB services to capture attacker activities.
- Built a real-time dashboard for monitoring attacks, protocols, and threat statistics.
- Implemented IP reputation analysis, anomaly detection, GeoIP tracking, and automated threat scoring.
- Generated security reports in CSV, JSON and PDF formats.

PDF Malware Analysis Toolkit

[GitHub](#)

Tech Stack: Python, PDFiD, pdf-parser.py, peepdf, YARA, SQLite

- Developed a static PDF malware analysis toolkit using Python, PDFiD, and peepdf.
- Extracted metadata, JavaScript, embedded objects, and Indicators of Compromise (IOCs).
- Generated automated risk scores and malware analysis reports.

Process Monitor Agent

[GitHub](#)

Tech Stack: Python, psutil, Windows, Logging

- Developed a Python-based Windows process monitoring agent.
- Detected suspicious processes and logged process activity.
- Generated real-time alerts for endpoint monitoring.

Skills

Tools: Nmap, Wireshark, Burp Suite, Metasploit

Networking: TCP/IP, DNS, HTTP, OSI Model

Programming: Python

Operating Systems: Kali Linux, Ubuntu, Windows

Certifications

- Junior Cybersecurity Analyst – Cisco Networking Academy
- Ethical Hacker – Cisco Networking Academy
- Cyber Threat Management – Cisco Networking Academy
- Endpoint Security – Cisco Networking Academy
- Cybersecurity Job Simulation – Forage

Education

H.I.M. College Sonipat

MCA (Pursuing), DCRUST University | Sep 2024 – Aug 2026

C.R.A. College Sonipat

B.Sc. Computer Science, MDU University | May 2021 – Aug 2024

ACHIEVEMENTS

- Ranked in the **Top 1% on TryHackMe** with **134+ completed labs and 13 badges**.
- Successfully completed a **6-month Cybersecurity Internship** and received a **Letter of Recommendation**.
- Developed multiple Python-based cybersecurity tools for malware analysis, threat detection, and system monitoring.
